# SAHAS ANNUAL REPORT 2015-16

SAHAS council of the 'Science and Humanities' department has had a wonderful year packed with an array of exciting events. SAHAS started the year with an adventurous thrill-filled trek to Karnala fort which got a thunderous response from the First Year students.

Our council also conducted a seminar on "Evaluation Scheme" for the First Year students in order to assist them in analyzing their academic scores. Our event for "Abhiyantriki" was "Pic-O-Mania" in which participants had to find a bunch of random things scattered across the Somaiya Campus and click selfies.

On the Science Day we also organized a seminar on "Advances in optics: LIGO" for science enthusiasts. On the occasion of "Zeal" the fest of "Science and Humanities" department we gave talented performing artists ranging from elegant dancers to soulful singers, a platform to showcase their talent. We had budding amateur students giving us art submissions ranging from sketches to paintings for the "Art Gallery". The most awaited first ever event of its kind event was the debate between faculty and students on the topic "Should Technology replace Teachers?". All the Council Members have definitely raised the bar for the next year. The versatility of this council and a blend of vivid events has indeed made SAHAS a success!
